Informational Booklet
For Non-UM Ordering Physicians

Accessing UM RIS/PAC
University of Miami Clinical Enterprise Technologies

Our Mission:

To design and deliver ongoing support for a network of Business and Clinical Information Management Systems which enhance the academic and research vision while implementing significant improvements in the quality, safety, and profitability of the UM clinical enterprise.

Our Vision:

To improve the processes and outcomes of the clinical enterprise by the widespread adoption of the latest information technology within a digital organization.
Welcome to UM RIS/PACS!

UM RIS/PACS (a.k.a GE ImageCast) is UM’s radiology information system (RIS) and picture archiving and communications system (PACS). This system replaces paper requisitions, x-ray film with digital imaging technology. All radiology work is recorded in the RIS and the resulting images are stored in the PACS. The RIS and the PACS are fully integrated with a shared database so that demographic information and study data is in synch between the two systems.
Instructions for obtaining training and access to UM CaneCare and UM RIS/PACS

1) Launch Internet Explorer.
2) In the address bar, type http://CET.MED.MIAMI.EDU
3) Immediately the UMCET Web Page Launches.

4) You may access the Electronic Access Request Form here. Click “Forms” and follow the instructions to complete and submit the form.

5) In the center of the screen, Click “Popular Links” and then Click “Training”.
