New functionality has been added to make it easier for you to view the contents of a workfile. You now have two options to review the items in a workfile:
- the original scrolling format
- a selector list that you can sort and filter

The new feature enables you to view the contents of a workfile in a selector format by using a new option, Option S at the Aoption field on the Process a Workfile - Summary Screen (APPW.S).

Additionally, the option method of L at the Option field on the Processing Workfile Screen (UPAS.A) and Process a Workfile -- Summary Screen (APPW.A) has been updated to enable end users to view the contents of a workfile in a report/listing format.

You want to view the contents of the IDX WORKFILE 189 in a Report/Listing format via Process a Workfile - Summary Screen.

To access the Process a workfile - Summary Screen (APPW.A):

1. Enter L in the Enter Choice field to list the items in the workfile and then press the Enter key.

This functionality was not available in IDX Flowcast 3.0.
The Process a Workfile - Summary Screen displays

2. Type **L** in the Option field, then press the **F10** key.

The Printer Device screen displays

3. Enter the printer device name in the **Device** field.
4. The report prints in the **Listing Format**

**In Version 4.0**

2. Type **L** in the Option field, then press the **F10** key.

**The Printer Device screen displays**

3. Enter the printer device name in the **Device** field.
4. The report prints in the **Listing Format**

**This is the report in Listing format**

---
